

## Expert opinions and assessment

on the educational program of Kyiv National University of Technologies and Design

**Name of the program:**     Fashion Industry    

**Program level (Bachelor, Master, Doctoral):**     Bachelor    

**Degree awarded:**     Bachelor of Fashion Industry    

**Speciality** 182 - Technologies of light Industry

Please evaluate the program considering the following issues:

<b>1. The purpose of the educational program is clearly defined. Program objectives and learning outcomes are logically linked.</b>	Complies	Substantially complies	Partially complies	Does not comply
	√			
<p>Descriptive review, analysis and comments:</p> <p>The goals of the educational program “Fashion Industry” is to train professional specialists of a wide profile for the fashion and light industries. The “Fashion industry” is a well-developed professional field in Ukraine, which confidently competes with European counterparts. The original fashion masterpieces of students and employees of KNUTD have repeatedly won prizes at international competitions.</p> <p>Today, the profession of a fashion industry specialist occupies an important place in the market economy of Ukraine. The need for highly qualified specialists (designers, pattern-makers, technologists) in this area forms one of the main demands of the modern economy. At the same time, today there is a growing need for generalists who have a broad outlook in various areas of the fashion industry, who are able to quickly navigate the current trends in the industry and respond to the dynamics of consumer requests, implementing them in their costume, shoe or accessory projects.</p> <p>A modern specialist should be able to create a product taking into account the aesthetic, functional and other aspects of the object, with perfect compliance with visual and consumer parameters. The professional activity of designers is an intellectual process based on theoretical knowledge, research activities and practical skills, which is the aim of this educational program “Fashion industry”.</p>				
<b>2. The learning outcomes of the program are clearly defined, corresponding to the field of study and the qualification awarded.</b>	Complies	Substantially complies	Partially complies	Does not comply
	√			
<p>Descriptive Review, Analysis and Commentary:</p> <p>The programs are formed taking into account the interdisciplinary approach, which implies the acquisition of a wide range of professional knowledge from the formation of the idea to the release of finished products. The program is built in such a way that it can fully achieve the intended learning outcomes, which are clearly and consistently established in the programs, are in full compliance with the sectoral characteristics and correspond to the qualifications awarded.</p>				
<b>3. The learning outcomes of the program correspond to the specifics of the field and the requirements of the labor market. Learning outcomes provide the opportunity to continue learning at the next level of education.</b>	Complies	Substantially complies	Partially complies	Does not comply
	√			
<p>Descriptive Review, Analysis and Commentary:</p> <p>The programs are designed with an interdisciplinary approach in mind, which involves mastering a wide range of professional knowledge from a sketch to the release of finished products. The program is built in such a way that it can fully achieve the intended learning outcomes, which are clearly and consistently described in the programs, are in full compliance with the sectoral characteristics and correspond to the qualifications to be awarded.</p>				

<b>4. The content and structure of the program ensure the achievement of the set goals and expected learning outcomes.</b>	Complies	Substantially complies	Partially complies	Does not comply
Descriptive Review, Analysis and Commentary:  After completing the "Fashion Industry" bachelor's and master's educational programs, graduates will be able to effectively carry out creative activities in the fashion and light industry and individual order enterprises, fashion houses and brand marketing firms, using theoretical knowledge, practical skills and innovative technologies. They will have the necessary knowledge and competence to establish their own production of apparel, footwear, accessories, which will expand the range of choices of fashion products on the modern consumer market. In order to meet the ever-growing aesthetic and utilitarian needs of the society, it is necessary to prepare professionals of the appropriate competence, which the program "Fashion industry" will be able to do. The development of the program sequentially, from simple to complex, proves that they provide the opportunity to continue to the next level of study.	√			
<b>5. The structure of the program is consistent, built in a logical sequence. The content, volume and complexity of the program correspond to the level of education.</b>	Complies	Substantially complies	Partially complies	Does not comply
Descriptive Review, Analysis and Commentary:  The training courses, study/teaching and assessment methods provided by the program are logically formed and will enable the student to develop both general and sectoral competencies necessary for professional activities, thus fully ensuring the achievement of the learning outcomes provided for by the program.	√			
<b>6. The literature specified in the study courses of the program (mandatory and additional) corresponds to the learning outcomes of the course and ensures the achievement of the learning outcomes of the program.</b>	Complies	Substantially complies	Partially complies	Does not comply
Descriptive Review, Analysis and Commentary:  The study courses of the programs ensure that the learning outcomes of the program are achieved. The qualifications awarded by the "Fashion Industry" program are consistent with the program content and learning outcomes.  The content, volume and complexity of the programs correspond to the respective levels of higher education. The prerequisites for admission to the programs are clearly described. The content, volume, sequence of training courses of the program of each level, and their importance for imparting relevant knowledge are in full compliance with the set goal and achievable results.  <b>Recommendation and Suggestions for programme development:</b> it is recommended to strengthen the work on a new textbooks in specialized disciplines corresponding to the modern topical requirements.	√
